

# *Alpenföhn*

# *Gletscherspalte*

The Alpenföhn-Brand presents with „Gletscherspalte“ a high-end CPU-cooler with a class of its own.

This cooler is not only a great visual impact, also the technical features are astonishing. The innovative sandwich-design allows to mount the 120mm-fan between two packages of aluminium-fins, and this assures an enormous cooling capacity combined with very low noise.

The user has the possibility to mount the fan blowing down or blowing up. In combination with a side-panel fan the manufacturer advises the fan-mounting blowing up. Thereby the heat from the DC-converters, chipsets and CPU will be blown out of the case.

**The result:**

**Lower case-temperature gives you more capability for overclocking!**

**Cooler specification:**

**article number:**

**8400000013**

**total high:**

**145 mm**

**paste:**

**2 gr. silver thermal compound**

**mounting:**

**universal mounting for Intel 775  
and AMD.**

## *Gletscherspalte*

*fan specification:*

**model:** GP/DF 1202512CD3poF-Q2  
**bearing:** sleeve bearing  
**size:** 120x120x25 mm  
**cable length:** 300 mm  
**voltage:** 12 VDC  
**speed:** 1300 rpm/min  
**noise:** 26 dB(A) max.

*heatsink specification:*

**size:** 140x144x133mm  
**material:** aluminium fins, copper baseplate and 6 copper pipes.

*usable for:*

All Intel LGA775, AMD and AM2 processors.
